ANTIFREEZE

Part Number	Description	Technical Description	Size
HBU8900	OAT Long Life Coolant	This product is an engine coolant concentrate based on the ethylene glycol. It contains a corrosion inhibitor package that is free from nitrates, amines, phosphates, borates and silicates. This long life coolant has been developed for the newest generation of modern automotive engines. It meets both the ASTM D 3306 and ASTM D 4985 specifications. Glyscantin G34 also meets the GM 6277 m engineering standard. OAT coolant gives an optimum degree of corrosion protection to all metals which are present in automotive engine coolant systems, particularly aluminum and its alloys, but also copper and brass. Its corrosion inhibitor package is very stable at high temperatures. Do not mix with traditional coolants or Supplementary Coolant Additives as it will reduce the product's life benefits.	25l
